

EXTREME SERVICE ROCK BUCKET

Shown with optional chocky blocks

Shown with optional spade lip

WBM Extreme Service Rock Buckets (Road Builder Buckets) are impact/abrasion resistant, designed with even further increased wear resistance to withstand extreme wear conditions in rock and quarry environments.

FEATURES & BENEFITS

- Uses upsized materials 'GET' ('Ground Engaging Tools') including larger base edge, adapters and teeth and is substantially stronger and tougher than a typical heavy duty product in the same class
- Dual tapered design for superior loading capabilities; reduces cycle times by optimizing machine's breakout and crowd forces
- Combination wear protection: vertical and horizontal wear bars (wrapper plate) for optimum protection
- Standard leading edge protectors, heel shrouds, outside cheek plates and weld-in liners for extended wear/service life and reduced maintenance costs

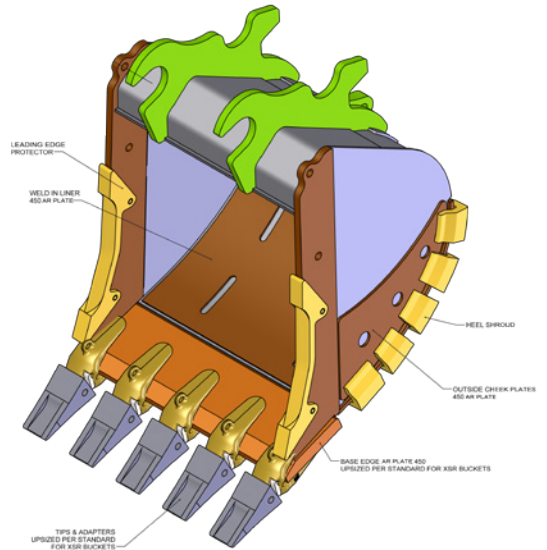

OPTIONAL EQUIPMENT

- Customers preferred brand of tooth
- 'Chocky' blocks and wear bar
- Two-piece side bar protectors
- Pin-on or quick-coupler lugging
- Spade lip
- Weld-on segments
