

QUICK EXTENSION STICK

A Quick Extension Stick is an excellent addition to an excavator that provides users with extended reach on their existing boom and stick. It enables users to utilize their conventional excavator as a long front excavator and then easily change back to a conventional front.

FEATURES & BENEFITS

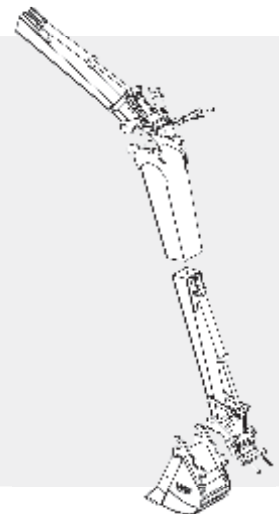

- WBM quick coupler lugging for easy installation and removal
- Heavy-duty construction
- Adds flexibility to excavators
- Provides more reach for excavators
- Cost effective way of increasing a machines digging envelope

STANDARD EQUIPMENT

- WBM quick coupler lugging
- Mounting bracket for bucket cylinder
- Bucket linkage and cylinder wedge coupler not included

OPTIONS

- Available in a wide variety of sizes depending on machine size and application
