

HYDRAULIC ANGLE SNOW BLADE

WBM Hydraulic Angle Snow Blades are designed to clear snow, offering a taller, more pronounced moldboard curvature that increases capacity and the 'rolling' action required in snow removal.

FEATURES AND BENEFITS

- Spring trip moldboard
- Available with WLKAT or OEM pin on lugs
- Adjustable skid shoes
- High back curved moldboard profile provides increased snow carrying and rolling capabilities
- Blade widths designed in 12" increments from 120" and up
- Positive angling force holds the blade in the desired position
- Skid shoes increase cutting edge wear life and grading characteristics
- Maximum usage of bolt-on edge material

MACHINE SERIES	WBM MODEL #	DESCRIPTION	WEIGHT (lbs)
WL125	WL125-HASB10	42" x 120"	2,750
WL150	WL150-HASB12	42" x 144"	2,875
WL175	WL175-HASB12	42" x 144"	2,940
WL200	WL200-HASB12	42" x 144"	2,970
WL250	WL250-HASB12	42" x 144"	3,050
WL250	WL250-HASB14	42" x 168"	3,200
WL300	WL300-HASB14	42" x 168"	3,320

STANDARD EQUIPMENT

- Dual hydraulic angling cylinders provide 30° of right or left angle
- Center drilled reversible bolt-on edges

OPTIONS

- Higher abrasive cutting edge (i.e. carbide) for extreme and high wear conditions
- ±5° of side-to-side oscillation. Allows the blade to follow uneven contours of road, highways, etc.
