

# LIGHT MATERIAL/SNOW BUCKETS

WBM Light Material/Snow Buckets offer a larger capacity over General Purpose Buckets. They are suitable for handling materials such as snow, peat moss, chips, hog fuel, etc.

## FEATURES AND BENEFITS

- Design provides high strength to weight characteristics
- Base edge is drilled to accept OEM bolt-on edges
- Bucket capacities are rated per SAE J742 and based on heaped capacities
- Available with WLKAT or OEM pin-on lugging
- Available in a wide variety of widths and capacities
- Larger capacity design allows the operator to maximize their payload in light material applications
- Design provides excellent loading characteristics in stock piling applications
- OEM drill pattern enables dealer after market parts sales

## STANDARD EQUIPMENT

- Bolt-on cutting edges
- 450 Brinell base edge, leading edge, weld-on heel plates, auxiliary side strip and weld-on seam (wrap around) wear plates
- 44,000 psi yield shell, strongback (frog) and sideplates
- One piece under shell support and rib configuration
- Spill guard and corner gussets

## OPTIONS

- Can be drilled for OEM edge system
- Visibility windows in shell upon request
