

RUNWAY PLOW (RAMP HOG)

WBM Runway Plows are used for clearing snow from airport runways and parking lots. They are available in a “straight blade” design, manufactured in 5’ increments starting at 15’ up to 30’. Ramp Hogs utilize bolt-on wings on each end of the blade to eliminate windrows and an optional rubber flap bolted to the top of the blade to decrease ‘blow-over’ of snow that affects operator visibility during high speed clearing.

FEATURES AND BENEFITS

- Lengths of 15 to 30 ft.
- Reinforced by vertical and horizontal moldboard ribs
- Wear resistant drilled base edge
- Bolt-on moldboard end plates
- Proven moldboard curvature
- Design increases snow stockpiling and clearing capabilities
- Excellent rigidity and twist resistance
- Bolt-on end plates increase snow carrying capacity or their removal allows for left or right hand snow discharge

STANDARD EQUIPMENT

- Bolt-on wings for ends of blade
- Adjustable skid shoes
- WLKAT lugging
- Bolt-on reversible cutting edges to promote wear life of the blade

OPTIONS

- Available in a range of widths and heights depending on application
- Rubber flap and restrictor plates to prevent snow from rolling over the blade
