

ENDGATED SNOW BLADE

Weldco-Beales Manufacturing Specialty Snow Blades with hydraulically lifted endgate(s) are great for preventing snow windrows from being deposited on driveways or other access points while clearing snow.

FEATURES AND BENEFITS

- Available with one or two endgates
- Endgate easily bolts onto most WBM snow blades – on either or both end(s)
- Endgates rotated in vertical motion
- Main blade moldboard hydraulically rotated 30° either direction
- Blade moldboard has a spring controlled trip edge
- Built-in float provides capability to follow road contour
- Bolt-on style lugging system

Maximum Main Moldboard Angle	30°
Main Moldboard Height *	42"
Endgate Assembly Weight (1 unit)	450 lbs
Endgate Cutting Edge Size	¾" x 24"
Endgate Rotation	109°

**Can vary with blade design*

Note: One hydraulic circuit required to operate an endgate; Specifications subject to change
