

HL SERIES HYDRAULIC WEDGE COUPLER

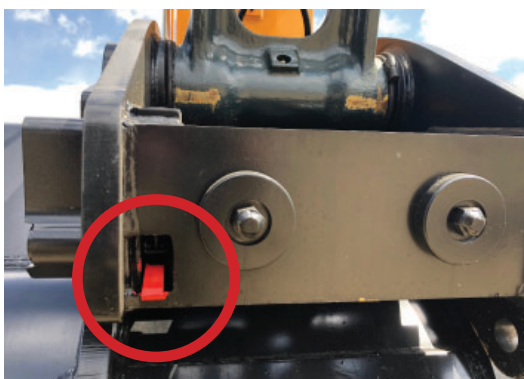

PATENT PENDING DESIGN

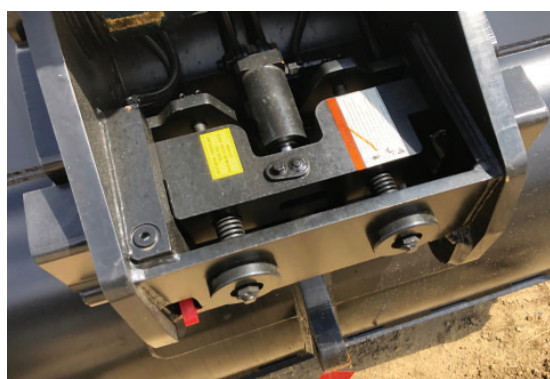

The WBM Patented HL Series Hydraulic Wedge Coupler incorporates a hydraulically controlled safety lock mechanism so the operator does not have to leave the cab.

FEATURES & BENEFITS

- Visual indicator informs operator of safety lock mechanism status
- Coupler available with hydraulic kit and control valve
- Coupler control module has audible and visual indicators that coupler wedge bar is in disengage position or mode
- Wedge bar controlled by a double acting cylinder with lock valve protection
- High pressure used to release wedge bar and lock
- Coupler frame has built in certified lifting eye
- Open frame design to allow easier clean out of material and debris
- Compatible with factory supplied coupler control circuits (some conditions apply)
- Available for excavator sizes Series 120 to 400
- Patent pending design
- Meets the requirements of international safety standard ISO 13031

Safety lock indicator
