

# POWERTILT COUPLER

The Weldco-Beales Manufacturing Powertilt Coupler increases the capabilities of any quick coupled attachment. Working as a tilting coupler, the Powertilt Coupler can rotate attachments up to 180°, making it ideal for sloped trenching, excavating around foundations and sidewalks, and ditch cleaning.

## FEATURES & BENEFITS

- Standard 140° rotation with 180° available on certain models
- Improved holding force increases productivity
- Available with common couplers and any WBM quick coupled attachment
- 100,000 yield WBM coupler lugging
- Easily removable
- Provides greater versatility
- Hardend seal and bearing surfaces reduces cost of ownership & longer life
- Integral rotary union for coupler eliminates hoses and hose guards
- Adaptable to a variety of attachments
- Overload protection with integrated cross-port relief valve
- Reduced weight for better stability and decreased fuel costs
