

# DUAL DRIVE CABLE REELER

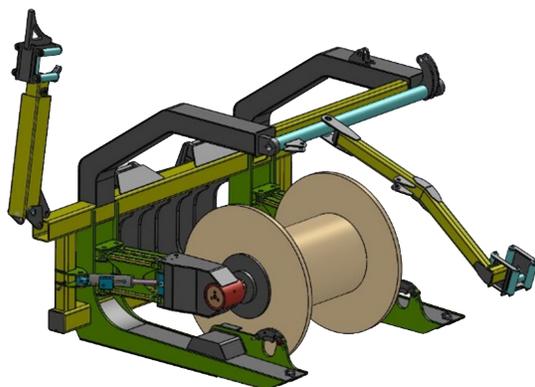

WBM "Dual Drive" Cable Reeler is designed to handle electric distribution and tailing cable used in open pit and underground mines around the globe.

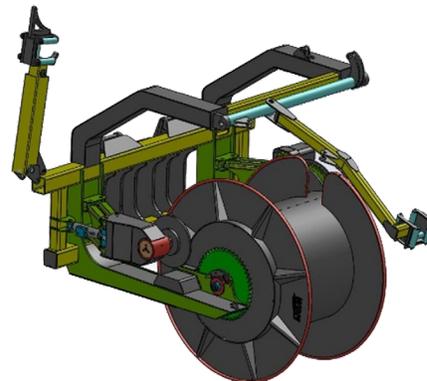

## FEATURES & BENEFITS

- Designed to use either standard wooden or steel cable drums or WBM CR300 (or competitive) Cable Drums
- Clamp arms allow typical wooden (steel) cable drums to be picked up and deployed
- "Lift and go" drive system allows WBM cable drum to be picked up and deployed
- Manual or hydraulic "free spool" valve available
- Front fairlead guides cable on or off the drum
- Telescopic side boom allows cable to be offset and positioned on the berm or cable stands
- Manufactured to fit any brand of wheel loader/dozer, or telehandler
